The Nebraska Department of Insurance is posting the following sample premium rates of all health plans that were submitted for use for plans under the federal Affordable Care Act in Nebraska during 2014. These proposed rates were submitted for actuarial review to determine compliance with Nebraska and federal law. These proposed rates are considered to be in draft form for those plans. Some plans will be offered on the federally facilitated marketplace. Others will be offered outside of the federally facilitated marketplace. The federally facilitated marketplace may review these plans again. The sample premium rates are being presented only as a preliminary tool for comparison.

Individual premium rates will be different based on geography, tobacco use and age. Please note that this information includes three sample age band rates. When open enrollment for the 2014 year begins on October 1, 2013 please remember that if you have any questions about your insurance options, you may review the resources available on www.healthcare.gov and you should not hesitate to contact your local Nebraska agent or broker. Your agent or broker may be able to assist you in deciding between the options available.
